

FACES: The National Craniofacial Association

*Each year 300,000 children in the U.S.
with a craniofacial disorder.*

**Parents of these children need somewhere to
turn for valuable information and words of reassurance.**

FACES Can Help.

For 37 years, [FACES: The National Craniofacial Association](#) has been dedicated to assisting children and adults who have craniofacial disorders resulting from disease, accident, or birth.

In the state of Tennessee, 1 to 2 out of every 1,000 babies will be born with a craniofacial birth defect. [FACES](#) provides:

- Lay-friendly information to parents and helps connect them with other families sharing a similar medical situation.
- Financial assistance to needy families who must travel away from home in order for their child to receive specialized reconstructive surgeries.
- Networking with other families sharing similar medical situations and resources, such as the locations of specialized craniofacial centers and the latest genetic research developments.

With your gift to FACES, doubt is replaced with knowledge, loneliness is replaced with connections, and helplessness is replaced with hope.

There is never a charge for any of our services.
